-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Inventorship

1. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Kumagai et al (US 6,763,707 B2).

Regarding claim 1, the reference of Kumagai et al discloses a failure determination system for internal combustion engine including the following subject matters: a method of testing a variable valve mechanism (9) for an internal combustion engine, comprising the steps of: operating the engine (see abstract);

Art Unit: 3747

inducing a misfire at least in part by commanding a change to a state of a variable valve mechanism (9) at a predetermined timing (col. 1, lines 32-55); and
detecting whether a misfire occurred (see fig. 3, col. 9, lines 15-48).

Regarding claims 2-3, as discussed in claim 1.

Regarding claim 4, the reference of Kumagai et al further discloses a step of controlling the engine to operate at a predetermined speed (col. 3, lines 6-11); and the detecting step includes a step of detecting an injection quantity increase (col. 2, lines 3-27, and lines 60-64).

Regarding claims 5-10, as above discussions.

Regarding claims 11-15, as above discussions, the reference of Kumagai et al further discloses the ECU (3) as a computer readable storage medium.

Regarding claims 16-18, as discussed in the method of claim 1.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The copies of U.S Patent are provided.

Ikenoue et al (US 4,648,903).
